INTENDA

COMPANY PROFILE

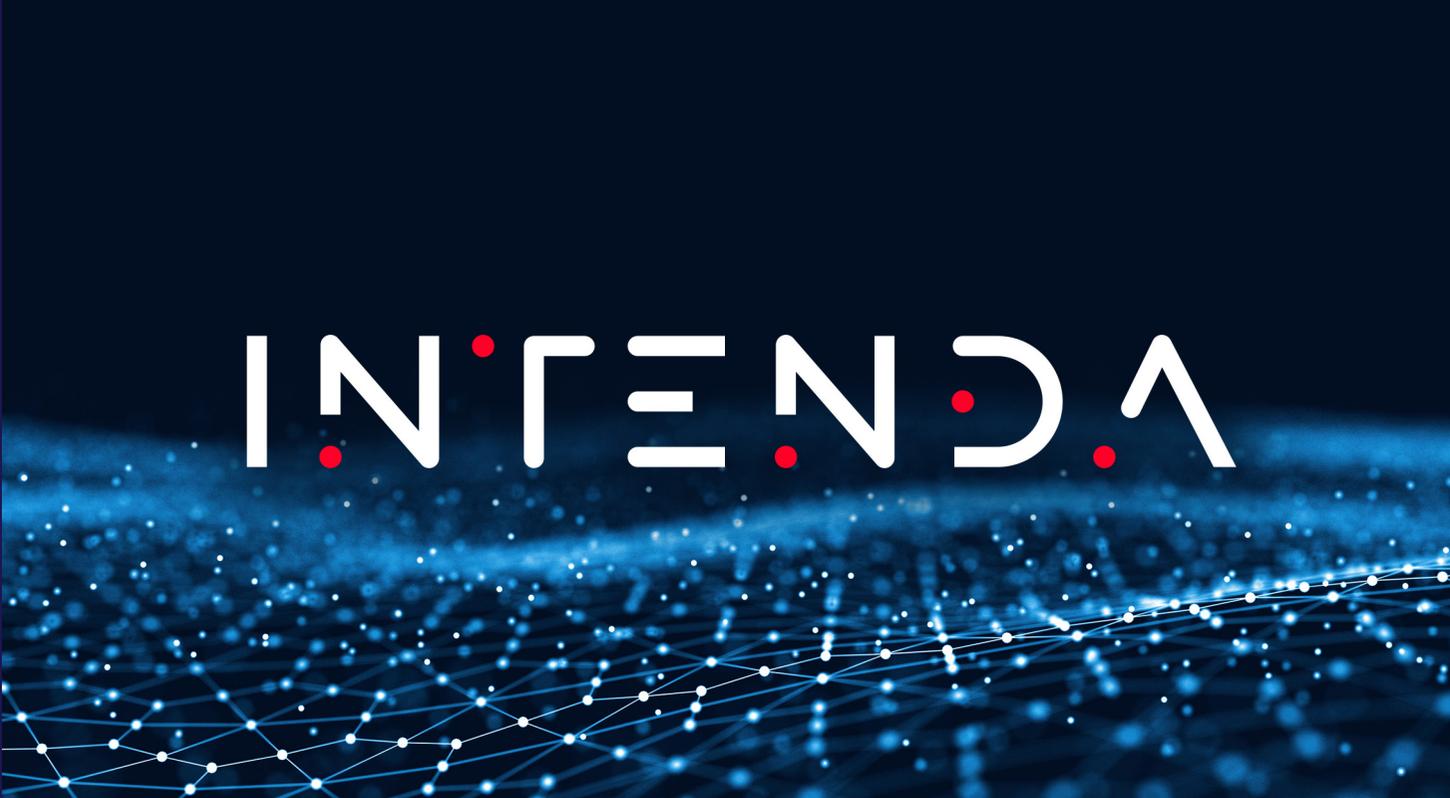

INTENDA

Intenda was founded in 2001 and is a multinational software company with offices in the UK, EU, USA and South Africa.

Our flagship product, Fraxses, is a metadata-driven data management and application development platform. We also offer consulting services and specialise in bespoke solutions and e-procurement solutions.

We see data inside out. When data management is at its optimum, businesses simply work better. Our teams are exceptionally skilled in creating frameworks that facilitate the development of mature enterprise software, and vastly experienced in utilising new technologies to drive businesses forward. Our solutions solve our customers' immediate data challenges and are designed to grow into the future, enabling our customers to achieve data freedom.

Our global customer base spans multiple regions and industries, including the public sector, banking, insurance, logistics, security, health, medical, petrochemical and retail.

The Intenda logo is displayed in white, uppercase letters against a background of a blue, glowing network of interconnected nodes and lines. The letters 'I', 'T', 'E', 'N', 'D', and 'A' are spaced out, with small red dots placed above the 'I', 'T', 'E', and 'D'.

INTENDA

Our solutions solve our customers' immediate data challenges and are designed to grow into the future, enabling our customers to achieve data freedom.

FRAXSES

Fraxes is a metadata-driven data management platform that simplifies big data. It enables businesses to create a secure data ecosystem, leveraging data virtualization to connect disparate data sources so that they function as a single environment. Fraxes is extremely versatile, providing businesses with a single solution to meet all their data needs and help them to execute a successful digital transformation process.

Fraxes facilitates unparalleled speed to data, and offers the capability to write back to source systems through the platform itself. Its various components are used to perform different tasks and include a data visualisation module with embedded BI, an integration module and a low-code/no-code development platform.

Fraxes is microservices-based, offering infinite scalability and providing the ideal framework on which to build a data fabric. Its underlying component infrastructure is built primarily on open-source software, however, the manner in which these technologies are applied is unique to Fraxes, and proprietary to Intenda. It can be deployed on any cloud provider, on-premise, or as a hybrid solution.

The logo for Fraxes is centered in the upper half of the page. It features the word "FRAXSES" in a bold, sans-serif font. The letter "X" is highlighted in red, while the other letters are white. The background is a dark blue and purple network of glowing lines and nodes, resembling a data mesh or a star map.

FRAXSES

Fraxes enables businesses to create a secure data ecosystem, connecting disparate data sources so that they function as a single environment.

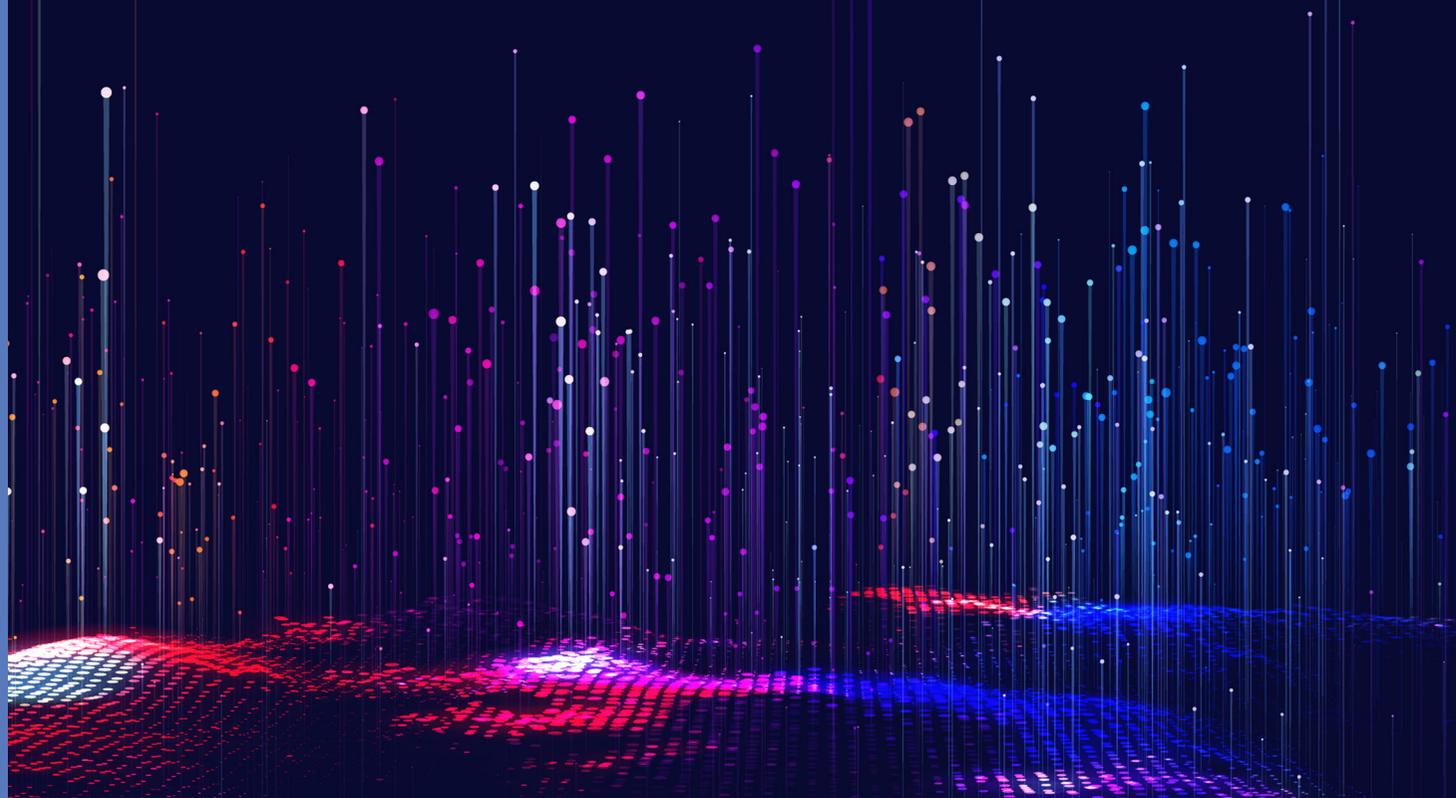

BESPOKE SOLUTIONS

We develop custom software applications for desktop and mobile as an exact fit to your requirements. Whether we're building a bespoke application from scratch or breathing new life into legacy systems, we deliver a comprehensive solution to meet your organisation's unique needs.

We execute projects using Agile development techniques that enable us to be flexible and respond rapidly to changes in requirements. We follow an iterative approach on all projects, regularly releasing working and tested versions of the software for customer feedback.

Where technology is not dictated, we utilise our rapid application development platform, Opus, which forms part of Fraxses. This approach allows us to offer the following advantages:

- A single futureproof architecture
- One technology for mobile and desktop
- Deploy and develop microservices/ functions in a serverless way
- Rapid development drives speed to market
- Pimarily a configuration driven tool set, resulting in lower maintenance costs and reduced total cost of ownership
- Embedded reporting with no extra cost

Bespoke solutions enable you to tailor your functions to your users, ensuring that they always receive the most relevant and useful information.

E-PROCUREMENT

The Intenda Solution Suite (ISS) is an end-to-end, fully integrated software solution that can interface with existing ERP systems or other software investments in your enterprise.

Developed on state-of-the-art technology, the suite comprises a set of modules, each unique in its offering. The modules can operate in standalone mode or as a collective solution, and include the following:

- Supplier Self Service
- Supplier Management
- Quotations
- Request for Sourcing
- RFx (Request for Proposals/Bids)
- Contract Management
- Purchase Management
- Management Reports

TECHNOLOGY PARTNERS

We partner with technology companies that are an ideal fit for Fraxses. Our carefully selected technology partners enable us to provide an end-to-end data platform to the global market.

ALLIANCE PARTNERS

We form alliances with partners to enable us to offer greater flexibility and value. In order to provide our customers with maximum benefit in service and quality, we ensure that only qualified organisations become Intenda partners.

Intenda and our partners are transforming the data management landscape and helping businesses to embrace true data federation. Our partners are instrumental in helping organisations use Fraxses to deliver business value and achieve client success.

THE INTENDA WAY

Intenda's unique technology enables us to give our customers an edge over their competitors, but it is in fact our people and the exceptional service we provide that are our greatest differentiators.

At Intenda, we employ dynamic individuals who are passionate about using technology to make a positive impact in the world. We believe that technology can advance freedom, equality and purposeful action in the workplace, and have a strong conviction in doing what's right to help our customers achieve data and technology freedom.

We value kindness and compassion, and approach the B2B market space with an awareness that like Intenda, every company we interact with is driven by people. We connect with those people and build enduring relationships with them.

Whether our customer is a blue-chip company or a small start-up, we place a premium on providing them with outstanding service. Our customers represent more to us than just end users – they are our partners.
